PLT (Total Stations)	431162	\$185.00	431169	\$285.00

*Prices subject to change without notice (plus shipping and taxes)

TOOLS THAT QUALIFY FOR FREE BASE CALIBRATION

Tool Fleet Management

All Measuring tools receive unlimited free calibrations during the Fleet term, including Ferrosan, X-Scan and Total Stations

Some limitations apply. Contact Hilti for full details.

Tool with 20-2-1 no cost period:

Tools receive one free calibration per year during the No-Cost period (two in total)

Exemptions that will not count towards the free calibration:

- The tool has been returned within 30 days after calibration and appears to have arrived back to the customer still out of calibration.
- The tool required a repair/fix/replacement of parts and calibration is part of repair: calibration is included in the cost of the repair.

All other calibrations are charged as per information above.
