

UNINTERRUPTED CORING

Water Management System DD-WMS 100 BLE

Spend less time managing water supply, slurry and dust removal, and more time on your wet diamond coring applications with the diamond drilling water management system DD-WMS 100 BLE.

APPLICATIONS AND ADVANTAGES

Advantages

- Collects and recycles slurry for use as cooling water
- 3 modes — recycling, vacuum cleaning and water supply
- Easy disposal process with collection of slurry in filter bag
- Virtually maintenance-free, saving you time and maximizing productivity

No more refilling the system throughout the day — the DD-WMS 100 BLE recycles wastewater up to 7 times, providing water autonomy of 30 gallons for a full day of coring.

Newly equipped with Bluetooth technology, connect with the new core rig DD 150-U for enhanced operator control and valuable troubleshooting alerts.

With the DD WMS 100-BLE, transform the diamond concrete core drilling from a cumbersome and time-consuming process into a faster, easier, and more intuitive process to take your jobsite to the next level of productivity.

Technical data

Filling volume	14 l
Supplied water volume per filling	100 l
Flow rate	2 l/min
Max. water pressure	7 bar
Hose length	16.5 ft
Weight	49.6 lb
Dimensions (LxWxH)	20.5 x 15 x 25.6 in
IP protection class	IP X5 (EN 60529)
A-weighted emission sound pressure level	76 dB (A)

Order information

Description	Item number
DD WMS 100-BLE Water Management System	3679407

Accessories

Description	Item number
Large filtration bag DD-WMS 100 MP5	2145833
Collection ring WCS 2-1/2"	2159810
Collection ring WCS 5"	2159811
Collection ring WCS 5-1/2"	2159812
Fixed water collector up to 6-1/4" BI	3578789
Collection ring WCS 7"	2159813
Collection ring WCS 10"	2159814
Water collector system DD-WCS-200 V	2215476
Water collector system DD-WCS-500 V	2215477
Adapter WCS-D 3-5/8"	2243438
Adapter WCS-D 6"	2243437
